| SECTION 1: Identification of the | substance/mixture and of the company/undertaking |
|--|--|
| 1.1. Product identifier | |
| Product form | : Mixture |
| Product name | : ENEOS Premium Ultra 5W-30 |
| Product code | : V161500012 |
| Product group | : Trade product |
| 1.2. Relevant identified uses of the | substance or mixture and uses advised against |
| 1.2.1. Relevant identified uses | |
| Intended for general public | |
| Main use category | : industrial use, professional use, consumer use |
| Use of the substance/mixture | Lubricant |
| Function or use category | : Lubricants and additives |

| Precautionary statements (CLP) | : P102 - Keep out of reach of children |
| EUH-statements | : EUH210 - Safety data sheet available on request |
| 2.3. Other hazards | |
| Other hazards not contributing to the classification | : This product floats on water and may affect the oxygen-balance in the water. The base oil contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified as T/R45: May cause cancer" (Note L).". USED ENGINE OILS: Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer. Frequent or prolonged contact with all types and makes of used engine oil must therefore be avoided and a high standard of personal hygiene maintained. |

| SECTION 4: First aid measures | |
|---|--|
| 4.1. Description of first aid measures | |
| First-aid measures general | : Seek medical attention if ill effect develops. |
| First-aid measures after inhalation | : Take victim to fresh air, in a quiet place, in an half laying position and if necessary take medical advice. Allow the victim to rest. |
| First-aid measures after skin contact | : Remove affected clothing and wash all exposed skin area with mild soap and water, followed by warm water rinse. High-pressure injection under skin may cause serious damage. Seek medical attention if ill effect or irritation develops. |
| First-aid measures after eye contact | : Remove contact lenses, if present and easy to do. Continue rinsing. Ensure adequate flushing of eyes by separating eyelids with the fingers. Obtain medical attention if pain, blinking, tears or redness persist. |
| First-aid measures after ingestion | : Consult a doctor/medical service if you feel unwell. If vomiting occurs spontaneously, keep head below the hips to prevent aspiration. Do not induce vomiting. |
| 4.2. Most important symptoms and effect | ts, both acute and delayed |
| Symptoms/injuries after inhalation | : At normal ambient temperatures this product will be unlikely to present an inhalation hazard because of its low volatility. May be harmful by inhalation if exposure to vapour, mists or fumes resulting from thermal decomposition products occurs. |
| Symptoms/injuries after skin contact | : Unlikely to cause harm to the skin on brief or occasional contact but prolonged or repeated exposure may lead to dermatitis. High pressure injection of product into the skin may lead to local necrosis if the product is not surgically removed. |
| Symptoms/injuries after eye contact | : Unlikely to cause more than transient stinging or redness if accidental eye contact occurs. |
| Symptoms/injuries after ingestion | : Bad taste. Unlikely to cause harm if accidentally swallowed in small doses, though larger quantities may cause nausea and diarrhoea. |
| Symptoms/injuries upon intravenous administration | : Unknown. |
| 4.3. Indication of any immediate medica | l attention and special treatment needed |

Treat symptomatically.

| SECTION 5: Firefighting measures | |
|--|---|
| 5.1. Extinguishing media | |
| Suitable extinguishing media | : Carbon dioxide (CO2), dry chemical powder, foam. Water fog. |
| Unsuitable extinguishing media | : Do not use a heavy water stream. Use of heavy stream of water may spread fire. |
| 5.2. Special hazards arising from the su | bstance or mixture |
| Fire hazard | : Combustion generates : CO, CO2, POx, NOx, SOx, H2S. Metallic oxides. |
| Explosion hazard | : Not expected to be a fire/explosion hazard under normal conditions of use. |
| 5.3. Advice for firefighters | |
| Precautionary measures fire | : Do not enter fire area without proper protective equipment, including respiratory protection. |
| Firefighting instructions | : Use water spray or fog for cooling exposed containers. |
| Protection during firefighting | : Use self-contained breathing apparatus and chemically protective clothing. |
| Other information | : Prevent fire-fighting water from entering environment. Sweep up and remove to a suitable, clearly marked container for disposal in accordance with local regulations. |

| SECTION 6: Accidental release m | easures |
| 6.1. Personal precautions, protective | equipment and emergency procedures |
| General measures | : Spill area may be slippery. Prevent soil and water pollution. Prevent entry to sewers and public waters. |
| 6.1.1. For non-emergency personnel | |
| Protective equipment | : When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required. Use protective clothing. |
| Emergency procedures | : Consider evacuation. |
| 6.1.2. For emergency responders | |
| Protective equipment | : When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required. |
| Emergency procedures | : No specific measures are necessary. |
| 6.2. Environmental precautions | |
| | material. Notify authorities if product enters sewers or public waters. Prevent soil and water pollution. urses, underground or low areas. Contain any spills with dikes or absorbents to prevent migration and |
| 6.3. Methods and material for contain | iment and cleaning up |
| For containment | : Large quantities: Contain large spillage with sand or earth. |
| Methods for cleaning up | : Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Take up large spills with pump or vacuum and finish with dry chemical absorbent. |
| Other information | : Use suitable disposal containers. Sweep up and remove to a suitable, clearly marked container for disposal in accordance with local regulations. On water, recover/skim from surface and pour out in disposal container. |
| 6.4. Reference to other sections | |
| For further information refer to section 13. | |
| SECTION 7: Handling and storage | |
| 7.1. Precautions for safe handling | |
| Additional hazards when processed | : Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly. |
| Precautions for safe handling | : Avoid prolonged and repeated contact with skin. May be dangerously slippery if spilled. Where contact with eyes or skin is likely, wear suitable protection. Do not eat, drink or smoke during use. Remove contaminated clothing and shoes. |
| Hygiene measures | : Take all necessary measures to avoid accidental discharge of products into drains and waterways due to the rupture of containers or transfer systems. Handle in accordance with good industrial hygiene and safety practice. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Where contact with eyes or skin is likely, wear suitable protection. Wash contaminated clothing before reuse. |
| 7.2. Conditions for safe storage, incl | uding any incompatibilities |
| Technical measures | : Keep container tightly closed and in well ventilated place. |
| Storage conditions | : Store in original container. |
| Incompatible products | : Reacts vigorously with strong oxidizers and acids. |
| Maximum storage period | : 5 year |
| Storage temperature | : ≤ 40 °C. |
| Prohibitions on mixed storage | : Keep away from : oxidizing materials. strong acids. |
| Storage area | : Store at ambient temperature. |
| Special rules on packaging | : Keep container tightly closed and dry. |
| 7.3. Specific end use(s) | |
| No additional information available | |

Safety Data Sheet

Consumer exposure controls

Other information

according to Regulation (EC) No. 453/2010

| 8.2. Exposure controls | |
|-----------------------------------|---|
| Appropriate engineering controls | : Large quantities: Contain large spillage with sand or earth. |
| Personal protective equipment | : Gloves. In case of splash hazard: safety glasses. Eye protection should only be necessary where liquid could be splashed or sprayed. |
| Materials for protective clothing | : PVC gloves. Neoprene or nitrile rubber gloves |
| Hand protection | : In case of repeated or prolonged contact wear gloves. The gloves should be replaced immediately in case of damage or signs of wear. It is recommended to use preventative skin protection (skin cream). The protection glove should be tested for its specific suitability (e.g. mechanical strength, product compatibility, anti-static properties). |
| Eye protection | : Eye protection should only be necessary where liquid could be splashed or sprayed |
| Skin and body protection | No special clothing/skin protection equipment is recommended under normal conditions of use. Avoid repeated or prolonged skin contact. If repeated skin contact or contamination of clothing is likely, protective clothing should be worn. Equipment should conform to EN 166. |
| Respiratory protection | Respiratory protective equipment is not normally required where there is adequate natural or local exhaust ventilation to control exposure. Where excessive vapour, mist, or dust may result, use approved respiratory protection equipment. Respiratory protective equipment must be checked to ensure it fits correctly each time it is worn. Provided an air-filtering/air-purifying respirator is suitable, a filter for particulates can be used for mist or fume. Use filter type P or comparable standard. A combination filter for particles and organic gases and vapours (boiling point >65°C) may be required if vapour or abnormal odour is also present due to high product temperature. Use filter type AP or comparable standard. |
| | |
| Environmental exposure controls | : See Heading 12. See Heading 6. |

: PVC gloves. Neoprene or nitrile rubber gloves.

: Do not put the product-soaked rags into the pockets of working clothes. Do not use cloths stained with the product to dry hands. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Do not eat, drink or smoke during use. Wash contaminated clothing before reuse.
